Examiner: Nguyen, David Q.

Atty Docket: 0102/0097

<u>AMENDMENT</u>

RECEIVED

JUL 1 5 2002

**Technology Center 2600** 

Sir:

This is a response to the Office Action dated April 25, 2002. Please amend the above-identified application as follows.

## In the Specification

Please amend the specification as follows:

Paragraph bridging pages 2-3:

Japanese published unexamined patent application 5-5626 discloses a navigation system which is designed so that data of emergency numbers fed from a CD-ROM, and its own position data of a vehicle estimated by means of a location device are stored in a FIFO memory. In addition, voices produced in the vehicle are stored in a voice storing device, and personal information about the driver of the vehicle and his fellow passengers is stored in an ID card device. In the navigation system of Japanese application 5-5626, the occurrence of an accident is detected by comparing a change in the signal of an acceleration sensor with a predetermined change in accident-caused impact acceleration.
